

# COMMUNITY HEALTH AND HYGIENE AT A GLANCE

2015 - 2025

**DRASA**  
Health Trust

## Why it Matters

In Nigerian communities, low uptake of routine prevention practices, weak community-level disease detection, and poor sanitation cause preventable diseases to spread— **62%** of caregivers delay seeking treatment for a child's fever, and **48** million people still practice open defecation.

DRASA equips citizens as Health Champions to promote healthy behaviors, prevent illnesses, and quickly detect diseases

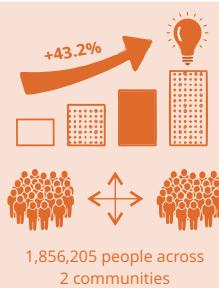

## Improving Community Knowledge & Response on Infectious Diseases

**2,089** community members trained (artisans, youth, market women, religious leaders)

**30+** suspected disease cases detected (mpox, measles, and cholera.) within **3** months

**43.2%** increase in knowledge among Health Champions serving a combined population of **1,856,205** people across **2** communities
